INTERNS

We are so thankful for the interns who work at LifeLine. Their passion, energy, and hearts are making such a profound impact in our communities. From arts to math, from science to deep conversation, from sports to dreaming, every intern brings so much heart to their work to help our young and adults thrive.

- Every day, kids come to the Loughborough Community Center to learn, grow, be safe, and enjoy life.
- Our youth is learning about healthy relationships and developing skills to respond well to the stressors of their lives.
- Our kids at Rivera Elementary School are learning to grow vegetables.

**YOUR LIFE
STORY IS NOT
YOUR LIFE
SENTENCE.**

LONG-TERM IMPACT

LifeLine CDC is about empowering under-resourced neighborhoods to thrive. We believe that every person has gifts and abilities and has something to contribute to the betterment of the community. We also believe that we are better together.

If you want to make a difference in your community, if you want to change the way our community runs right now, JOIN US!!!!

We are opening McNamara Community Center!!! Working in partnership with the City of Merced, we are excited to have a place for kids and adults alike. We will assist with resumes, and resources, afterschool programs, and provide a place to gather and learn from each other.

We are thankful for the partnerships we have with individuals, service clubs to churches, city and county entities. We are working together to empower under-resourced neighborhoods to thrive.
